14.010 Policy

(A) County Road funds will be used to complement other sources of funds to accomplish industrial infrastructure development required to allow (permit) the creation of new jobs. This funding may take the form of direct street construction or as a grant for street improvements required for a specific development.

(B) The specific development must be necessary to create new permanent family wage jobs in Linn County. These jobs must result directly from the street improvement construction and be created with reasonable immediacy.

(C) Funding will be entirely applied toward the future obligation of Linn County to improve county roads within a city as defined by ORS 368.001 (1).

(D) The City receiving the funding must accept jurisdiction pursuant to ORS 373.270 over

the particular county road subject of the negotiated improvement, thus relieving Linn County of any future construction and maintenance obligation.

(E) The fund will be equally accessible to all Linn County cities for development that meets the policy criteria.

(F) The Linn County Board of Commissioners will have full discretion as to the amount of funding and which specific projects will be selected for funding.

[Adopted 90-123 eff 2/7/90]
